SUMMARY

AI & Machine Learning graduate with hands-on experience in Python, SQL, Power BI, Excel, and machine learning through college projects and internships. I like learning new technologies and solving practical problems. I have also worked with different types of data and software tools during my academic work and internships. I am comfortable learning new concepts and taking responsibility for assigned work. Looking for an entry-level opportunity where I can apply my knowledge, learn from real projects, and build my skills with experience.

SKILLS

Data: Data Cleaning, Data Analysis, EDA, Data Visualization, ETL, Reporting
Programming & Database: Python, SQL, MySQL, PHP
BI & Visualization: Power BI, Tableau, Looker Studio, Advanced Excel (Pivot Tables, VLOOKUP)
Python Libraries: Pandas, NumPy, scikit-learn, Matplotlib, OpenCV
Machine Learning: Classification, Regression, Predictive Analytics, Model Evaluation, NLP

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning — Sept 2023 – June 2026
Adarsh Institute of Technology & Research Center — CGPA: 8/10

Diploma in Computer Engineering — Oct 2020 – June 2023
Bharati Vidyapeeth's College of Engineering — 76%

Secondary School Certificate (SSC) — June 2019 – March 2020
Pt. Vishnu Digambarkar Vidyalaya — 79%

PROJECTS

Customer Churn & Revenue Risk Analysis

- Analysed more than 7,000 customer records with Python and SQL, checking customer information, account activity, and churn-related data.
- Used scikit-learn to train a Logistic Regression model for churn classification and obtained 80% accuracy on the test dataset.

Sales Dashboard Analysis

- Prepared a Power BI dashboard from more than 10,000 sales records, covering revenue figures, sales performance, and monthly sales trends.
- Used SQL queries to collect and prepare sales data for reports, which helped reduce repeated manual reporting work by around 40%.

AI-Powered Smart Interview Preparation System

- Made a Python application for mock interview practice using NLP and speech recognition to process and review interview responses.
- Added voice and facial analysis features and tested the application during more than 100 mock interview sessions.

INTERNSHIP EXPERIENCE

Mobile Application Developer Intern | ECS Software Technologies Pvt. Ltd. — Feb 2026 – Aug 2026

- Updated Android application screens with Java and Android Studio, including changes made across more than 5 screens.
- Worked on feature updates, application checks, and issue fixing while making changes to the Android application.

Python & Machine Learning Intern | Techspot Infotech — Apr 2024 – May 2024

- Used Python on datasets containing more than 5,000 records for data cleaning, preparation, and basic machine learning tasks.
- Prepared input features, checked dataset values, and reviewed model results as part of the assigned machine learning work.

Software Trainee | Earth Logicware Technologies — Jul 2022 – Aug 2022

- Worked with PHP and MySQL modules used in web-based management applications and assisted with changes to application components.
- Wrote SQL queries and handled database operations for storing, retrieving, and updating application data.
