SUMMARY

B.Tech graduate in Artificial Intelligence and Machine Learning with knowledge of Python , SQL , Power BI , Excel , and machine learning. College projects and internships involved data analysis, data cleaning, dashboard development, and software development. Interested in starting a career in Data Analytics or a related technology role.

TECHNICAL SKILLS

Programming Languages: Python, Java, PHP, SQL, Bash

Operating Systems: Linux, Ubuntu, Windows

Linux Skills: Command-Line Operations, File Management, Directory Management, File Permissions, Process Management, Package Management, Log Monitoring, Basic Troubleshooting

Tools: Docker, Git, GitHub, Android Studio

Databases: MySQL, SQLite, Firebase

IT Support: Technical Troubleshooting, Software Testing, Database Connectivity, Problem Solving

Data Analysis: Data Cleaning, EDA, Data Validation, ETL, Reporting, Data Visualization

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV

BI Tools: Power BI, Tableau, Looker Studio, Advanced Excel

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning — Sept 2023 – June 2026
Adarsh Institute of Technology & Research Center — 8/10

Diploma in Computer Engineering — Oct 2020 – June 2023
Bharati Vidyapeeth College of Engineering — 76%

Secondary School Certificate (SSC) — June 2019 – March 2020
Pt. Vishnu Digambar Paluskar Vidyalaya — 79%

PROJECTS

Customer Churn & Revenue Risk Analysis

- Analyzed the Telco Customer Churn dataset using Python, Pandas and NumPy; cleaned data, explored customer behaviour and examined revenue risk.
- I built a Random Forest classification model with Scikit-learn to find high-risk customers and help with customer retention decisions.

Sales Dashboard Analysis

- Created a Power BI dashboard using over 10,000 sales records to track revenue, sales performance and monthly trends.
- Used SQL to prepare sales data and reduced repeated manual reporting work by around 40%.

AI-Powered Smart Interview Preparation System

- Developed a Python application for interview practice using natural language processing and speech recognition to guide users through interview questions.

INTERNSHIP EXPERIENCE

Project Trainee | ECS Software Technologies Pvt. Ltd. — Feb 2026 – Aug 2026

- Contributed to the Pigmy Bank Management System in the IT Operations department.
- Developed Customer Registration Module features using Java, XML and Android SDK, and created app screens in Android Studio.
- Worked on registration functionality, database connectivity and software testing.

AI/ML Developer Intern | Techspot Infotech — Mar 2024 – May 2024

- Completed assignments and project tasks involving Artificial Intelligence and Machine Learning concepts and tools.
- Practised machine learning methods and problem-solving through internship activities.

Software Trainee | Earth LogicWare Technologies — Jul 2022 – Aug 2022

- I worked with PHP and MySQL to handle software tasks, such, as project design and analysis.
- Finished assigned tasks. I kept improving PHP, MySQL and software tasks communication and problem-solving skills.

CERTIFICATIONS & RESEARCH

- Google Cloud Career Launchpad – Data Analytics Track, 2025
- GenAI Powered Data Analytics – Tata Forage, 2025
- Python for Data Science – IBM, 2025
- Research Presentation: “AI-Powered Smart Interview Preparation System with Voice & Facial Analysis,” National Conference on Recent Trends in Engineering & Technology, 2026
- Publication: “Automatic Waste Segregation System,” IJIRT, Vol. 12, Issue 7, 2025
